Inhalation

Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Skin Contact

After contact with skin, wash immediately with plenty of soap and water. In the event of contact with molten product: Cool

Eye Contact	affected area quickly with water. Do not attempt to remove hardened product. Obtain medical attention.
Ingestion	Flush eyes with water for at least 2 minutes while holding eyelids open. Call a physician (or poison control centre immediately). Do not induce vomiting wash out mouth with water.
<b>4.2 Most important symptoms and effects, both acute and delayed</b>	Unlikely to be required but if necessary treat symptomatically.

<b>5.2 Special hazards arising from the substance or mixture</b>	In case of fire the following can develop: Oxides of carbon.
<b>5.3 Advice for fire-fighters</b>	A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions. Dust is ignitable but will not sustain combustion. A high temperature source of ignition is required. Insensitive to sparks. The minimum spark energy required for ignition of a dust cloud is greater than 5000 mJ. It will not train fire, e.g. along beams etc.
